Idol immersion- Action Taken Report

Ganesh Chaturthi and Durga Puja are auspicious festivals celebrated every year throughout the country. During these festivals, Maa Durga and Bhagwan Ganesha idols are carved, worshipped and later on immersed in nearby water bodies such as rivers, lakes and ponds by the devotees. These idols are generally made up of clay, Plaster of Paris (PoP), thermocol accessories, plastic materials and other decorative items and are also painted with harmful inorganic paints/ colors. When these idols are released in water bodies after worship, they contaminate them by dissolving various pollutants and thereby degrading the water quality of receiving water bodies. Increased use of Plaster of Paris (PoP) based idols, use of dyes containing toxic metals, plastic and thermocol accessories for decoration and immersion of such idols in water bodies causes pollution.

While celebrating Ganesh Chaturthi and Durga Puja festivals people generally ignore environmental impact of pollution on Air, Water, Noise, solid Waste, etc caused by various activities performed in puja. Increase in consumerism during the festival increases traffic congestion which in turn increases air pollutants, which are released into the atmosphere by vehicles. The celebration of Ganapati and Durga Puja festivals lead to increase in the level of harmful gases in atmosphere like Sulphur dioxides (SO₂), Carbon Monoxides (CO), etc.

In recent years, we have seen increased awareness about water pollution caused by visarjan i.e. immersion of Ganesh and Durga Idols in lakes, rivers and Sea which are made out of Plaster of Paris (PoP) i.e. calcium sulphate hemi –hydrate. It takes several months to totally dissolve Ganesh Idols made up of PoP into water. Also, colors used in decoration of idols contain harmful chemicals containing mercury, lead which leaks into water as idol dissolves. It increases acid content, Total Dissolved solids (TDS) and Heavy metals in water. It kills aquatic plants and marine life, damaging ecosystem under water. Along with Ganesh & Durga idols people dump other accessories like thermocol, plastics, etc. as well adding to the level of water pollution.

Devotees celebrate the prestigious festival with all possible means of loud music like listening to bhajans, kirtans and songs using massive speakers. During Anant Chaturdashi and Durga Visarjan, which is the final day of these auspicious festivals, we witness heavy traffic on the roads, which leads to an increase in Air (particles from vehicles) and Noise (excessive honking) pollution.

Along with Idols several other accessories are used in worship of Ganapati and Durga Puja and Durga Puja such as, flowers, fruits, coconuts, camphor, cloth, plastic, thermocol. Etc. It is collectively called as Nirmalya. Every year government spends crores of rupees to clean and dig out tons of garbage from natural water sources such as rivers, lakes etc.

Considering the pollution caused by this activity in natural water bodies, Hon'ble Court passed an order for CPCB to prescribe "Guidelines for Idols immersion", which initially was issued in the year 2010 and subsequently was revised and issued in May, 2020 effective from 01.01.2021 by Central Pollution Control Board.

Further, Hon'ble NGT in the matter of OA No. 673/2018 has specifically emphasized for prohibition of idol immersion in to rivers and water bodies and observe that chief Secretaries may issue directions to concerned departments for creation of artificial ponds, if found absolutely necessary (as done in NCR Delhi region for preventing pollution in river Yamuna) for idol immersion during festivals like Ganesh Chaturthi and Durga Pooja specifying prior permission of district administration and strict time lines pertaining to religious days only.

That Hon'ble NGT has also directed that any one violating the NGT's orders/directions shall be liable for environmental compensation @ Rs. 50,000/- and such other penal actions, as may be deemed appropriate in accordance with law. Further, violation of directions issued under sec.5 of the E P Act, 1986 or the rules made thereunder shall be punished under section 15 of the said act which includes imprisonment up to 05 years and/ or with fine which may extend up to Rs. one lakhs or with both. Considering above, NMCG reiterates directions issued on dated 16/09/19 impressing upon the State Govt. /authorities for their strict compliance.

During recent years, there has been availability of various substitute materials for idol making, safe disposal measures such as visargan in artificial kunds/ponds and environment friendly decorative items to prevent our natural water bodies from pollution.

For effective implementation of "Revised Guidelines for Idols immersion" and directions issued by Hon'ble NGT in the matter of OA No. 673/2018, all the Regional Offices of MP Pollution Control Board has organised awareness raising workshops, displayed posters and banners and distributed pamphlet for information dissemination, awareness raising and publicity. News articles were also publications in newspapers which results in increase in the number of eco-friendly idols and medium and small sized sculptures in recent years.

The local authority, municipal corporations and municipalities prepared temporary visargan kunds for immersing the idols in accordance with the guidelines resulting in preventing the quality of water sources from being impacted. A permanent idol immersion pool / kund were also constructed on the banks of the Narmada River in Amarkantak in order to accommodate the large number of idols that were immersed there throughout the years being holy place. The board is coordinating with the local authorities to maintain clean, pollution free water sources as per the revised guidelines.

To analyse the quality of the water, samples were collected before, during, and one week after the idol immersion from various sites. The point wise action taken report along with photographs, paper cutting of news published in local papers are attached as follows:-

1.No use of synthetic material/nonbiodegradable material,pop, baked clay, resin fibres and thermocol etc. for making of idols (for immersion/ visarjan thereof). use of toxic and non-biodegradable chemical dyes / Synthetic paints for painting ofidolsshould be strictly prohibited.

- ✓ The board ran the following programme, which prohibited the use of pop, baked clay, artificial or nonbiodegradable materials, etc., in the making of idols.

1. Workshops

- ✓ Workshops for making sculptures out of natural materials were organized.
